The 2020 collection from Byhand African Artisans introduces new ways of combining expert artisanship with timeless slow design.

We have elaborated on the concept of artisan joint designs where brass and stone incorporates their different qualities into the object.

This collection is inspired by the aesthetic Japanese concept of wabi sabi. It's a set of aesthetics that embraces the imperfect, the rough, the simple and appreciates the ingenious integrity of natural objects and processes.

For us the perfection of design is a holistic approach starting from the raw material to the finished product. The perfection is in the hands and the mark made on each person behind. Sometimes the imperfect is the perfection in itself.

SIMPLICITY  
IS THE ULTIMATE  
SOPHISTICATION
